Magazines
<a href="#">Teaching4Learning</a>
<a href="#">Creative Teaching and Learning</a>
<a href="#">The eLearning Learning</a>

1)

Databases were searched in the following order: Current Contents (CC), Science Citation Index (SCI), Science Citation Index Expanded (SCIE), Scopus, Inspec. The first database indexing the target journal was listed.

2)

Impact Factor for 2009. Impact Factor measures how often articles in a specific journal have been cited. The total number of quotes during a year of the two immediately preceding years' issues. In this case, it is the number of quotations in 2009 of the "citable items" (articles, reviews, proceedings, or notes) published in selected journal in 2007 and 2008, weighed against the total number of "citable items" published in 2007 and 2008 in the same journal. [Source.](#)

3)

5-Year Impact Factor

4)

Immediacy Index. Immediacy Index measures the average number of times that an article, published in a specific year within a specific journal, is cited over the course of the same year. [Source.](#)

5)

Cited Half-life. Cited Half-life measures the number of years, going back from the current year, that account for half the total citations received by the cited journal in the current year. [Source.](#)

6)

Eigenfactor Score. With all else equal, a journal's Eigenfactor score doubles when it doubles in size. [Source.](#)

7)

Article Influence Score. Article Influence Score scales Eigenfactor score by the number of articles published by the journal and thus is directly comparable to impact factor.
